

How **important** is it for  
you to know the **accurate**  
weight of your paper?

If it is, you might like to know about the NEW DPS  
- the paper computer.

- **Totally accurate digital weight of paper**
  - **Weigh ANY size sheet of paper**
  - **Brand new product**
  - **Preset sizes for added convenience**
  - **Unique ink-tolerance feature - accurately assess weight after printing**
- 
- A digital paper scale with a blue and white design. It features a digital display screen showing '0.00' and a 'dps' logo. The scale is shown from a top-down perspective, with a white paper sheet partially visible on its surface.

**From stamp size to 3 metres square - from 40gsm to 600gsm and more, the DPS does it all!**

The DPS is a new product rapidly being taken up by paper professionals, printing companies, corporate clients, in fact anyone who needs to know the weight of paper.

- Saves time in measuring ANY size sheet of paper - no cutting! It's safer too.
- Unheard of accuracy
- Accreditations pending from the industry's leading bodies
- Portable and light-weight - can be moved to different sites
- Huge quality benefits - do you really know the weight of your paper before printing?
- Can be used as a counting scales or general scales too
- Protection from potential loss or client problems in using the incorrect sheet weight

**A truly unique product which will bring many benefits to your business.**
