

Landscolight Inspection Light **Model ITL**

For inspection table:

The ITL (short throw light) is a unit designed to turn a flat, level surface into an inspection area of sizable proportions. It can also be placed along side a moving web to create an on-line inspection light. This model can illuminate surfaces from 102 cm wide within 7,6 cm from the light to 244 cm wide just 122 cm from the light, with an effective depth view of 152 cm. All operating controls are located on the side of the unit for operator convenience.

Can be used by any manufacturer who needs to detect surface defects. These markets include printing, converting, paper manufacturing, corrugated, flooring, carpet manufacturing and gypsum board or any manufacturer looking for surface defects.

<u>Dimensions:</u>	Width:	101,6 cm
	Height:	17,14 cm
	Depth:	24,13 cm
	Weight:	15 kg

<u>Technical data lamp:</u>	2 x300 Watt, halogen lamp
<u>Elektrical data:</u>	120 VAC, 60 CPS, 610 Watt
